Detailed Action

1. Claims 1 to 25 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to a polymerization method.

Group II, claim(s) 8-19, drawn to apparatus for discharging polymer.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the polymerization method in of Group I and the apparatus for discharging polymer of Group II do not share the special technical features because Group I is directed to a polymerization method while Group II is directed to apparatus for discharging polymer. Further, the method as claimed does not necessary require the use of the apparatus of Group II invention.

A telephone call was made to Andrew D. Meikle (Registration No. 32,868) on July 14, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
